A ripple of excitement was caused in the ranks of the strikers today by the rumor that the Risdon Iron Works was preparing to put a sufficient number of non-union men at work to complete the repairs on the Charles D. Lane, but the reports could not be verified. The number of strikers' pickets at the Risdon plant was increased as a result of it. The manner in which these pickets are doing their work presents a novelty new to this particular strike. They are stationed near all the plants where men are at work, or from which strikers walked out. The purpose of their presence there is both to keep the unions informed as to what is being done, and to endeavor to induce such non-union men as they meet to join the strikers. Many of the pickets are armed with snap-shot cameras, and at noon, when the men leave their work, the pickets take photographs of them for future use. These pictures are later enlarged and placed in a collection, which the strikers term their "Scab" gallery. was preparing to put a sufficient num

There has been no decrease in confidence expressed by the respective sides in their ability to win the fight. Talks with employers today resulted in the reiteration by them of their determination not to yield, and among the strikers the same feeling was manifest. To the question of how long the strike, will last, representatives of both sides had the same answer: "Until the other side gives in." The possibility of a compromise is admitted. sibility of a compromise is admitted. but just how and when it can be brought about, neither side appears to have any idea.

brought about, neither side appears to have any idea.

The carriagemakers have returned to work, and are claiming that they have won the strike. The fact is that that struggle resulted in a signal victory for the principle, for the maintenance, of which the powerful Employers' Association was organized. The carriagemakers might have returned to work several days ago, but they held out because of the refusal of their employers to listen to the proposition that all shops must be unionized. Their other demands had been granted, with some silight modifications, but when they insisted upon the recognition of unionism, which meant practically to control their employers' affairs, they were answered with a determined "no." They were given until today to return to work, the alternative being the importation of men to fill their places, and they returned to work. It is believed that this victory for the principle of non-recognition of unions will have a salutary efficiency of the principle of non-recognition of unions will have a salutary efficiency.

EXPECT A COMPROMISE.

EXPECT A COMPROMISE.

BOTH SIDES MAY TILLD.

[BY DIRECT WIRE TO THE TIMES.]

SAN FRANCISCO, May 23.—[Exclusive Dispatch:] It is confidently expected that the strike of the iron workers will soon be settled by compromise; in fact, powerful influences are now at work to bring a settlement about. The signing of the union scale by a number of the smaller shops has had little, if any, bearing upon the strike situation. Such action was expected. The larger establishments will not follow the lead of smaller ones, and it is to adjust the differences existing between the owners and the men of these big plants, that the effort to secure some kind of a compromise is being, made.

The feature of the strike situation which indicates that such efforts will be successful, is the remarkable good feeling which exists between the opposing sides. The employers have nothing but kind words for their men, and the men have expressed no harsh feelings for their employers. Each side is maintaining a dignified stand, and each is seemingly ready to meet the other half way.

The question of the recognition of unionism has been practically eliminated from the contest, and a most important step in the direction of an amicable settlement was taken yesterday, when the official head of the organization used these words:

"We are not insisting upon the firms signing our agreement, provided they post notices granting the hours, wages, and other such terms as we ask. This stand is taken in pursuance to instructions from the International Association."

If the question of recognition of unionism be eliminated, there seems to

nave been well paid for but for the strike. These transfers of important contracts include, among other, certain repairs to some of the government transports, a class of work which San Francisco has used every effort to keep here since the expansion of the country called the transport service into being. In this particular the strike ing. In this particular the strike may affect largely many branches of trade not included in the non-working and ship-building industries. AGITATORS' EFFORTS BLOCKED.

That reception and the iaunching were considered by the President and his party the most notable features of their visit to this city, but if certain few of the labor agitators had had their way about it, heither would have taken place. The argument used was that rather than have the launching postponed, the employers would be almost compelled to accede to any demands made upon them. EXPORTS OF OIL. HAVE GROWN ENORMOUSLY.

(BY DIRECT WIRE TO THE TIMES.)

WASHINGTON, May 23.—(Exclusive Dispatch.) The Bureau of Statistics of the Treasury Department issued the following statement regarding oil ex-

ports:

"Recent oil discoveries in Toxas and on the Pacific Coast lend special interest to the fact just presented by the Treasury Burcau of Statistics regarding the exports of mineral oils from the United States. These show the exportations of the fiscal year—were probably the largest in the history of this remarkable industry, which increased its exports from 204,000,000 gallons of illuminating oil in 1875, to 721,-

"In the mere question of gallons of
oil produced, Russia has been for years
a close competitor of the United States,
though it is probable that recent discoveries in the United States enable it
to continue to lead in the number
of gallons produced, while the fact
that American oil produces nearly
twice as much refined illuminating oil
from a given quantity of crude, as Russian oil, adds greatly to its value as
a commercial product.

"One special interesting feature in
the development of the oil industry is
that there has been a remarkable decrease in price to the consumer durling the period in which actual exportations and the net value of exports

Armed Band Massacres Many Native Converts-Government Powerless.

PEKING, May 22.—[Exclusive Dispatch.] Recently high Chinese officers here memorialised the court to return to Peking. A reply has just been received, in which the officers referred to are ordered not to make a request of this kind again until all the foreign troops have left Peking. The reply adds that when the peace envoys notify the Emperor and Dowager Empress that the troops have gone, the tourt will immediately return, but not before. This shows there is a possibility of another deadlock in the future, as no satisfactory arrangements have been made for guaranteeing the security of life and property here, or in other districts, when the transfer of authority takes place. In districts where this transfer was attempted, after evacuation by the French troops, disturbances increased at once. In one of these districts, an armed band of 500, which adopted another name than "Boxers," has arisen, and is massacreing many native converts and overpowering the Chinese verts and overpowering the Chinese troops.

The central government is as power-

see has not yet sent an expedition against these people, but has sent out several small parties to suppress the banditti. The British have also sent out small parties to other districts with the same object. All these troops will simply do police duty.

INCREASE OF DUTIES. AMERICAN VIEWS THEREON.

WASHINGTON, May 23.—The position of the United States, as understood here, is that if Chinese duties on imports were increased, and the government regarded it as likely that an increase in these duties must be made in order that China could meet demands of the powers for indemnity, attendant upon this increase, should be measures providing for greater freedom of trade between China and the outside world, an abolition of the likin tax, and possibly other reforms, This government is strongly in favor, of a considerable increase in the number of Chinese treaty ports, and the removal of traffe restrictions at some of those now open.

The likin tax is reported with disfavor, principally on the ground that it is a source of corruption, as it is said a considerable part of the tax sticks to the fingers of officials. This tax is one levied in China on goods every time they are transported from one province to another. It has made it difficult to calculate just how much goods would cost, deliverable outsile of a treaty port. Our government has thought the Chinese customs tariff might be raised from 5 per cent. to 10 per cent., if other proport, as accompanied the increase in the Juties.

STARTLING UNANIMITY.

POWERS PUT ON INDEMNITY. POWERS PUT ON INDEMNITY. [BY DIRECT WIRE TO THE TIMES.]
WASHINGTON. May 23.—[Exclusive Dispatch.] Fruitless has been the attempt of the United States to induce the powers to forego the blood which they must take with the pound of flesh to be exacted of China.
Special Commissioner Rockhill's proposal that the amount of indemnity be reduced to \$200,000,000 has been rejected with a unanimity which is positively startling, when it is recalled that Great Britain has been loud in her protestations in favor of placing the

protestations in favor of placing the lump sum at this figure. The powers have determined that China shall pay \$337,000,000, and not a cent less, and a dispatch received from Rockhill today by David J. Hill, acting Secretary of State received. by David J. Hill, acting Secretary of State, reporting this fact, means the end of American efforts on this point. The proposal of this government that China issue bonds to the powers bear-ing interest at 3 per cert. has not been acted upon, but it is likely to be op-posed by the powers of continental Europe. The bonds issued to this gov-ernment will amount to \$25,000,000, and with a governmental guarantee, there is no doubt that they could be promptly

old-at par.

Great Britain's bonds would be sold with equal facility. But the sissian 4 per cent. bonds are sold at , and the 3 per cent. bonds would consequently probably not command this price. The credit of other nations of continental Europe is not as good as that of Russia. Spain, for instance, which has put in a claim, could not dispose of 3 per cent. bonds at par. It will be to the interest of such governments to have the bonds bear a higher

BANKING INTERESTS SPOIL STORY ABOUT THE BALANCE,

Europe's Debt to This Country Largely Offset by the Spendings of the Willy Wally Astor and Countess re Castellane Class and by Other Expenditures

(BY DIRECT WIRE TO THE TIMES.) NEW YORK, May 23.-{Exclusive NEW YORK. May 23.—[Exclusive Dispatch.] Important banking interests in this city admitted today that the be lief that has generally obtained that the United States has at the present moment a great international credit balance: that is, a great mass of debt owed to this country by Europe, is not well founded. As matter of fact, the United States is at this time, in reality, through operations of the foreign exchange market, owing Europe, alchange market, owing Europe, al-though this debt will be settled later

One banker who was interviewed sald that there had for a long time been a great deal of misinformation circulated regarding the extent of this big go-called international trade balance in favor of the United States.

"Since about April," said this banker, "some of the largest banking houses here having dealings with Europe have drawn very large amounts of skyt and ninety-day bills of exchange, and they are still drawing them. These bills are not drawn against balances abload, but are in the nature of loan bills. Such bills are regularly drawn every summer, but this year they began to be drawn earlier than usual, about April 1, although they usually do not begin to appear until along in May. If any balances existed abroad the bills drawn would be demand bills of exchange, not long bills.

"In figuring a balance in favor of this country on the basis of net exports of merchandise over net imports of merchandise, there has been no taking into account the very large amount of money that rich Americans residing abroad spend there, the money, of course, being drawn from this country. In this category are such men as Wil-ilam Waldorf Astor and Bradley Martin, and such women as the Countess de Castellane and the Duchess of Mariborough. There is a great number of such rich foreign Americans living in London, Paris and Italy, and to them can be added a great many more Americans of less wealth, who also live abroad and who spend very large sums in the aggregate. For example, there are living in the city of Dres-den alone thirty thousand Americans "Besides all this, there is the amo

O'Connell said a strike of the machinists on the Seaboard Air Line would occur tomorrow morning. He said the strikers would number between five and six hundred. Advices to headquarters here indicate that at fan Francisco many of the smaller concerns are ready to grant the demands, but are not ready to sign the agreement. At Indianapolis, the American Bicycle Company is reported as agreeing to the demands, but refusing to sign the agreement. The same condition exists at several other points, and the matter is being left to organizations to settle.

My Dear Clark: Mitchell and I very much appreciate the cablegram from you and others of the Twentieth in Lawrence on the success of our recent kidnaping trip into the mountains of Northern Luzon. We certainly had a most remarkable piece of good fortune. It was one of the very hardest tramps I have ever taken, and tried us to the limit. You have doubtless read in the papers all of the essential facts of the expedition, of the well-worked-out scheme, including the forgery of letters from insurgent generals; of how we landed on the coast at night, more than a hundred miles from 'Aguinaldo's camp, and of the constant deception we were compelled to practice to pass ourselves off as insurgents, dragging along their five prisoners.

Right here I wish to say that I did not enjoy this business of being a prisoner with the insurgents. It is a galling thing for a man who has been brought up in Kansas to come down to a diet of rice and snalls and be yanked TUROPE IS JEALOUS AND WILL RETALIATE

"We have mustered great armies. The greatest army that eyer was mustered was from '61 to '65. And yet, when the war was over, when Lee surrendered to Grant at Appomattox, the nearly two millions of men came back to their homes, fell into the quiet walks of citizenships, sustaining the government for which you fought. And so you come back, as your fathers came, more than thirty years ago, having done your duty, and it is a proud thing done your duty, and it is a proud thing to do duty for a country. You come back having done your full duty as solto wish for all of you and to all be-longing to you every good thing in this life. I thank you."

At the close of the President's re-

marks three cheers were given by the soldiers. 'The President, escorted by Gen. Shafter and Col. Girard, then visited the general military hospital, one of the largest and most complete in the United States. 'Not since the lark days when Abraham Line passed through the hospital tents of the Army of the Potomac, speaking words of comfort and good cheer to sick and dying soldiers, have been en-acted the scenes which were there witnessed. The President passed thro every ward, smiling and wishing the patients speedy recovery. Some grasped him by the hand, and not a man did he overlook. Before leaving the grounds he met the ladies of the Red

STOCKTON'S EXPECTATIONS. [BY THE NEW ASSOCIATED PRESS-A.M.] STOCKTON, May 23. Secretary Brown of the Stockton Chamber of Commerce received a telegram this afternoon from M. H. de Young of the San Francisco Chronicle, stating that President McKinley had decided to go east by way of Stockton next Saturday, His train will leave Oakland Mole at 16:45 o'clock a.m., and probably reach Stockton at 1:45 o'clock in the afternoon.

The President will make a few re-marks from the rear of the last car, and a public reception will be tendered him at the depot, Surrounding towns will be notified of the fact of the President's coming, and a great crowd is expected here that day.

SAN FRANCISCO, May 23.—Pioneer Hall was filled tonight with members of the G.A.R., when Gen. Barnes in-troduced the President as "Comrade William McKin'ey." The announce-ment was sufficient to arouse the enthusiasm of the veterans. The hall was decorated handsomely with flags, banners and guidons when the Presi-dent and his escort entered. The audience rose and made a military salute.

After a brief and eloquent introduction
by Gen. Barnes, the President responded as follows:

of the Republic: It would have been more picasing to me, and I am sure quite as satisfactory to you, if, we had been permitted to sit during the evening under the spell of the thrilling elegants of the property of the prop querice of Gen. Earnes. [Applause.] No one can tell the story of the war or move our hearts as he. No one can paint the valor and the sarrifices of the men who fought from 1861 to 1865 and recite as he can the glorious mission of the flag.

cated the principles of government by the people, and made the Declaration of Independence which for nearly three-quarters of a century had been only a promise, a glorious fulfillment. You established the fact that free government was not a failure or an experiment, but had demonstrated its fitness to be operated among the great nations of the world. You made liberty, universal. You put the Constitution of the United States where it never had been before and where, under God, it shall stand forever, with civil and political equality to every citizen beneath the fing. We are in the habit of saying that mustered for the preservation of the Union was the best blood of the republic, and it is true. We had from every State and Territory of the Union the brightest and best, the old ar. the young, and those in middle life; those who gave—up everything—home, family, comfort, wealth, great careers in civil life—all were given up that they might save for the mselves and their children the freest government on earth.

And the Grand Army of the Republic has the exceptional distinction of furnishing from its ranks five men to serve as President of the United States. [Great applause.] They served with you, and with you suffered with you, and with you shared in the triumphs of the war.

"Not only, my comrades, did we have a splendid army, but when the war was over, the army constituted a loyal citizenship. There is not a man who served in the Civil War that was not a better citizen when he came home. "I have just returned from an exploration of Nome and other parts of Alaska, and without deference to opin-Alaska, and without deterence to opinion—scientific or otherwise—I have concluded that the earth's gravity, having at some former period been disturbed, has by the slow process of time, reestablished its conditions by a change of axis, moving from the southeast to the northwest, and the ocean, following the movement of the earth in that direction, changed the once tropical zone of the north pole into an Arctic Circle of perpetual ice and snow, sweeping before it the northerly portion of the Rocky Mountains and the mineral lized deposits and ledges of the mineral belt, lying between the Rockies and the Arctic and Bering seas, which had previously been disintegrated by volcanic heat. This is clearly proven by the general trend of the earth's stratification, in places not disturbed by contraction. Also by the immense depths of auriferous deposits in the Trace and the Arctical diffusion.

and ignorance of conditions, acting on illi-advised testimony. Mining in piacer and quarts can be as successfully carried out in that region as elsawhere. Winter is the only season of the year, for the conveyance of supplies and machinery into the interior, and summer is one long day, in which as much work can be done as in nine or ten months in temperate zones. What is wanted in that country is skillful and experienced management, combined with honesty and economy. With proper safeguards, steady habits and warm quarters, the climate is as conductive to good health as any part of the globe, and from now on the opportunities for investment of capital are greater than in any other part of the world.

"With amendment of laws, preventing fraud and giving equal protection to capital and labor, the building of railways to coal fields and diggings, and direct communication with the outer world, Alaska, with its furs, oils, fish and base and precious metals, will become one of the wealthest sections in the Union, and the only one entitled to the honor of being The North Star State."

order for 9 o'clock today, with the additional condition that the discussion should not be interrupted by other business until the commissioners reached some definite conclusion. The committee was appointed by the General Assembly at St. Louis last year.
The controversy regarding revision has led to the formation of three groups among the 840 commissioners to the General Assembly. First, there is the conservative group, composed of those opposed to any change whatever in the doctrinal standards of the church. Then there is a party desirous of setting aside the Confession of Faith as not truthfully expressing the belief of the church. Between these stands the centrists, who favor maintaining the old confession with a few modifications, and who desire the adoption of a clear "declarative" statement, setting forth the most important doctrines, and laying special emphasis upon the love of God for mankind and on the work of the Holy Spirit.

In answer to the questions submitted to the presbyteries, fifty asked the assembly to dismiss the whole subject, one was undecided, four said they neither desired a revision nor a supplemental statement, one revision and an explanatory statement, fifty-two a supplemental statement, and an explanatory statement and a supplemental statement, one an explanatory statement and a supplemental statement, fourteen a substitute creed, one an alternative creed and six some change not specified, and of the 233 presbyteries, fifteen in the United States and states in foreign lands falled to respond.

Fully an hour before the doors of Calvary Church were opened, crowds thronged the entrance, and when the devotional exercises began the galleries were filled to overflowing.

Bills and Overtures and other matters.

Rev. Dr. Asa S. Fiske of Washington, D. C., offered a resolution congratulating President McKinley upon the prompt recovery from an apparently fatal illness of Mrs. McKinley and offering thanks to God at the prospect of her early return to her home. The resolution was unemimously adopted.

Dr. Roberts, stated clerk, announced that there is still two days' business to be disposed of after the revision question is settled.

READING OF REPORT.

The order of the day, the reading

sembly at 12:39 o'clock p.m. took a recess until 2:30 o'clock.

DR. M'KIBBEN'S ARGUMENT.

Dr. McKibben said it was certain that a majority of the presbyteries favored a creedal change, but in his opinion the church is determined that no change will be made that will touch a single fundamental doctrine. No new creed is desired, he said, as only four-teen presbyteries had voted for that proposition.

Dr. McKibben said the confession should be made clear on the subject of elect infants. It should be demonstrated to this generation, he said, that God's grace lays hold in the set of death and glorifles the infant into transformation when it takes the child from its mother's heart. Dr. McKibben asked that the resolution be voted down, and made a passionate appeal against the adoption of recommendation 'B' of the majority report. This recommendation calls for a brief summary of the reformed faith, bearing the same relation to the confession which the shorter catechism bears to the larger catechism bears to the larger catechism bears to the larger catechism. and formed on the general model of the consensus creed prepared for the assembly of 1892, or the "articles of faith" of the Presbyterian Church of England. He strongly urged recommendation "C." which asks for the preparation of amendments to several chapters of the confession of faith, either by the modification of text, or by declaration, so as to more clearly express the mind of the church with additional statements concerning the love of God for all mes. IDAY BIKE RACING. ATTON AT NEWARK, N. J.

TORK, May 22.—Chief Justice of Newark, N. J., has taken which will probably result in the standard of the Valisburg bleyele of Sunday. He called the attended the grand fury to the fact that

acces where prizes are given are a vio-ation of the statute, and places where such practices are habitually permit-ted are indictable as being disorderly. Some weeks ago the social club of Valisburg complained to the Chief of Police of Sunday racing at the track. He refused to interfere, and the matter was taken to Chief Justice Dupue, who ordered Sheriff Virtue to visit the track and make a report. The report of the Sheriff was to the effect that there was no disorder, but the Chief Justice said to the grand Jury on this point that the families living in the neighborhood of the track were entitled to protection if they asked it.

ers to win back the American cup captured several seasons ago by a picked
team of British players. The American
players will select a crack team and a
series of matches will be arranged, to
be decided on the international field at
Hurlingham.

The game was comparatively new in
this country when, a few seasons ago,
the English players came here, and,
alded by well-trained ponies, won the

DROBLEMS OF TAXATION DISCUSSED BY EXPERTS.

ATIONAL CIVIC FEDERATION CON-FERENCE OPENS.

egates-Prof. Seligman of Columbia University Delivers an Address Ex-plaining Object of the Meeting.

BY THE NEW ASSOCIATED PRESS. F. S., BUFFALO (N. Y.) May 23.—A large number of prominent men from all arts of the United States, representing all the conflicting theories of what

number of prominent men from all parts of the United States, representing all the conflicting theories of what constitutes proper systems of taxation for raising revenue for Federal, State and municipal government, met in the Public Library Hall today. The conference was called by the National Civic Federation.

Prof. R.A. Seligman, instructor of political economy at the University of Columbia, read a paper on "inequalities of Taxation."

Prof. Seligman declared that while economy in government is necessary, the taxation problem cannot be solved by the cutting down of expenditures. He then went on to show that public expenses have increased far more rapidly than has the population. Said he:

"The population of New York City today is about the same as that of the entire country at the beginning of the present government. Yet whereas New York spends about \$100,000,000 a year, the expenditures of the United States began at \$4,000,000, and even during the first decade of its existence under the present Constitution averaged only about \$8,000,000 a year. In the Federal government, whereas since 1890 the population has increased twenty-fold, from \$4,000,000 to \$80,000,000, the expenditure has increased one hundred and fifty-fold, from \$4,000,000 to \$600,000,000. In State and local finances the figures are still more striking. New York State spent in 1706 less than \$150,000. In State and local finances the figures as much. New York City spent in 1800, with a population of \$80,000, on the expenditure has increased 1000 times. The burdens are beginning to be felt."

Prof. Seligman said the economic transitions of the past few decades had made necessary a revision of tax systems. Said he: "The changes are three in number, first, the transition from the agricultural to the industrial stage; second, the growth of corporate enterprises; third, the broadening of the market and the disappearance of the State lines in business activity."

He pointed out the difficulty of applying tax laws to personal property, and suggested th

tions.

James A. Garfield of Cleveland spoke on "The Listing of Personal Property."

The proper method of taxing personal property was taken up and after a lengthy discussion of the subject a resolution offered by Prof. Seligman was passed, providing that the steps taken for the formation of a national organization for the reformation of taxation methods.

After a recess, Prof. Fred C. Howe of Cleveland read a paper on the subject of Federal restraint on taxation of franchises. A general discussion followed.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, May 23.—[Exclusive Dispatch:] John E. Overton, State Game Protector, raided the Arctic Freezing Company's warehouse on West street today. Overton received a report that there were many game birds in cold storage there. He found 2100 birds in two rooms on the second floor. The birds found were snipe, woodcock, partridge, quall, grouse, readhead duck and canvasback duck. Possession of game birds is a misdemeanor. The fine is \$60 for the first offense, and \$25 for each bird. As there were over 2100 birds found, the company may be called upon to pay a fine of \$52,500. Overton only searched two rooms. There are forty-seven more rooms, which may contain more game birds. It is thought there are nearly 100,000 birds in the house. This would make the warehouse people lishele to fines amounting to £500,000, if the letter of the law were to be enforced.

Noxious Weeds.

T MAY now be accepted as a gen-eral practice that the fruit farmers of Southern California are using cyanide and distillate for the extermination of scale pests. The fruit grow-ers have ceased to expect relief from the various parasitic friends which at one time were depended upon for the final riddance of the various kinds of insect infections that had attacked the orchards of this part of the State. I believe this is a wise conclusion, and geles county, who imported literally thousands of the rhizobius a few years ago to compass the extinction of the scale in his orchards, has given up the made in favor of all the imported parasites, except the well-known cardinal ladybird and a small fly, have been a great hindrance to the adoption of the gas or the distillate treatment. The failure of these alleged parasitic friends has armed the shiftless portion of the growers' fraternity with an excuse that has cost them and their neighbors an immense, an incalculable sum of money.

The Russian thistle is almost uncouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the sense that it shows the plant is just getting started here, but discouraging in the recognition of the gas or the distillate treatment. The failure of these alleged parasitic friends has armed the shiftless portion of the growers' fraternity with an excuse that has cost them and their neighbors an immense, an incalculable sum of money.

sprowers' fraternity with an excuse that has cost them and their neighbors an incalculable sum of money. "View with alarm" any attempt to continue this waiting policy, and go to work with the weapons science and experience have demonstrated to be the only reliable remedy.

A Protective Association.

The Board of Horticulture spent the entire day last Wednesday in consultation with the fruit growers of Downey and Rivera regarding a united effort to stamp out the purple scale. Ne definite conclusion was reached as to cooperation with the Downey growers, but the board was more fortunate with the Rivera people. After a consultation with the latter, lasting throughout the afternoon, definite action was taken in the formation of an association for the protection of the citrus orchards. A large majority of the fruit farmers signed an agreement to begin work under a plan to be presented by the board, and by the ist of June something will be doing down there toward the redemption of the citrus trees in that locality. To facilitate this work the commissioners have transferred one of their best inspectors to the Downey and Rivera districts, with instructions to camp with those good people every working day in the month and devote his entire time to the plotting and examination of orchards, advising with and working with the growers until something definite and successful has been accomplished. On the 1st of June this inspector will be fled upon every effort made to rid the community of this great incubus, and every trial encouraged that is made in good faith to do the work.

At reversal it is the firtuition of the course work and in the science of the course of the terms of the terms of the course of the c

MOTICE TO PARTONS.

We have a second to the complete of the co

servations. Should the claims of Mr.
Hall and other friends of the distillate emulsion prove tenable a new era will have been inaugurated and fruit-growing made less expensive and yet fully as successful. It is time this matter was determined under all conditions, and the local horticultural authorities believe the coming experiments will establish beyond question the efficacy or the impotency of distillate spray.

Noxious Weeds. Noxious Weeds.

To those who realize what an additional thrill of commercial joy has been engendered by the advent of the present grain and hay crop in Southern California the subject of weed pests becomes doubly interesting. In looking over a map drawn to indicate the distribution of the Russian thistle I noticed two little dark spots upon the State of California. One of them indicates the prevalence of the weed in this section. This is important, if true, and it is true. This destructive plant has made its appearance here and the Supervisors of Los Angeles county have recognised the fact in the enactment of an ordinance designed especially for its extermination. It becomes an object of grave apprehension to the wheat and barley growers.

On the lat of June this inspector will be ready for business. A report will be filed upon every effort made to rid the community of the work.

At present it is the intention of the people of Rivera to resort to cyanide and to the use of a new distillate. It was also the voice of that meeting that those who persisted in their course of indifference toward the danger from the purple scale should be compelled by law to do their part in the general clean-up. The association, elected by ballot an executive committee of three, consisting of F. L. ONE MILLARD-HIS MENDACITY

The January issue of Scribner's Mag azine contained an article by Thomas Millard on the subject of the Peking relief expedition. In that article he gave an elaborate account of the march to Peking, and related many blood-curdling incidents alleged have occurred en route, such as the at the rate of 70 per cent, bayoneting or shooting down of deetc. Mr. Millard's article reflected severely on the American soldiers and

reply to the false charges and miswas guilty. Gen. Chaffee declares, in the first place, that although Millard wrote of the relief expedition as if he were an eyewitness of the event and as if he had accompay ed the expedition, "he must surely base his by his imagination," for it is a matter of fact and of record that he did not after the ar ival of the relief column These facts speak for themselves, and

expedition.

Millard stated, among other things, that the Japanese and Russian troops on the march, bayoneted and shot helpless non-combatants, and added that "our armies are not free from these wanton sacrifices." Gen. Chaf-fee declares not only that Millard saw nothing of the kind described by him in language so yellow, but that no by the American forces. Gen. Chaffee is certainly better qualified to speak in was not only with the expedition, but commanded it, while Millard did not two months after the expedition reached Peking. As for the matter of veracity, most Americans will give credence to the statements of Gen. Chaffee in preference to the sensational hearsay stories of the corre

pondent of Scribner's.

Another assertion by Millard was to and hut over a stretch of country ten miles wide in the path of the troops was first looted and then burned." A to this statement, Gen. Chaffee says that not less than three-quarters of the today, and that a still larger proportion were standing when Millard arrived at Peking, two montus behind the relief expedition.

Millard further stated that "within week after coming to Peking onea week after coming to Peking onethird of the American force was in the
hospital." To disprove this assertion
Gen. Chaffee quotes from the army
records, showing the number of men
in hospital from stage to stage of the
journey. From these records it appears that five days after entering
Peking, or on August 20, only 8.2 per
cent. of the total American force were
sick and unfit for service. This was
an increase of only 4.4 per cent. from
August 4, when the expedition started
out from Tien-Tsin. The maximum
was reached on August 31, when 11.6
per cent. of the American troops were
sick. Even this maximum was only
one-third as great a percentage of the
total as that alleged by Mr. Millard.

Chaffee declares that no one ever knew of this excepting Mr. Millard. Gen. Chaffee further shows, in replying to the stupid and malicious misrepresentations of Millard, that the American troops were better fed than those of any other nation; that the American wagons carried six times the load carried by the Japanese wagons, and more than the wagons of any other nation; also that the American wagon service was more mobile, and therefore more efficient, than that of any other division; and that all the troops used the water found along the route, the Japa as well as the rest. of the other divisions." Upon the authority of the Japanese chief surgeon,

Gen. Chaffee's report is a complete slanders invented by Millard and tofore regarded as respectable. The vast majority of the American people of soreheads and faultfinders, having their headquarters in Boston and callwill no doubt prefer to accept the post-bellum imaginings of Millard an honored and honorable veteran general in the American army, who led the expeditions. SHERIFF LACY'S STATEMENTS.

SANTA ANA, May 23.—(From The Times' Resident Cornespondent.] Additional details were obtained today of Sheriff Lacy's search for Ross Widdihold at the vegetarian colony and apook roost at Placentia yesterday, and as a result the whereabouts of the misring young man are veiled in deeper mystery than before the search was made. Widdihold was not found a prisoner in the colony, as many of the Placentia folk anticipated he would be, but that he has dropped so completely out of sight since he left Ortega's sheep camp, where he stated positively he was going to the colony to search for his brother, lends an air of mystery to the episode which causes neighbors to shake their heads significantly, and to predict startling future developments in the case. The officers are now making an effort in Los Angeles to get some clew which may lend to the discovery of the whereabouts of the young man, as it is know, that he spent some days in that city before coming to Fullerton a week or ten days ago.

Sheriff Lacy said today that when he entered the house vesterday in SHERIFF LACY'S STATEMENTS.

MISS HALL BREAKS DOWN.

Leading Lady of the Cummings Com-pany Has Been Added to the Victime of Stock Work

of Stock Work.

Laura Nelson Hall, the leading woman of the Cummings Stock Company, playing at the Burbank Theater, is seriously ill at her home, No. 510 South Hill street. She has broken down under the strain of stock work.

Sunday night, after the last curtain of "Woman Against Woman," Miss Hall had to be taken home in a carriage. She was hysterical and temporarily unbalanced. She recovered somewhat, and insisted on playing her part the following night; then she completely collapsed. She is now in charge of three physicians, and is most of the time out of her mind. She keeps beging those about her to remove the tight band that is crushing her head. When she recovers sufficiently, Miss Hall will be sent to Catalina. She may then return to the company, or go home to her people in Philadelphia. Her father is senior owner of the Backhurst umbrella factory.

Her piace is taken temporarily by Miss Angus, but Mr. Cummings has engaged Jack Mason and Katherine Gray, who have been playing with Liebler's "Christian" company in Chicago. They will leave for Los Angeles mext Saturday, and will make their first appearance in "Lady, of Quality" week after next. yesterday with a signal of types.

It is the way that he explained to, the railroad clerk: The Newman Club met last night at Levy's, about forty members being present. One of the chief features of the gathering was a paper by M. J. Mc-Garry on "Leo XIII, Prince of the Catholic Church, and Defender of the Faith."

Garry on "Leo XIII, Prince of the Catholic Church, and Defender of the Faith."

Mr. McGarry reviewed the life of the man destined to become the Holy Father, pointing to the fact that in carly life he displayed an intelligent grasp of intricate questions, and showing how in youth he became a keen observer of men.

Referring to the many encyclicals issued by the Pope, the speaker called attention to the one in which the Holy Father endeavored to stem the rising tide of nihilism, socialism and communism, when it threatened the direct calamity to the church, the state and the family. The speaker referred to the encyclical of the Holy Father on labor also make the many of the Holy Father on labor as one which, in the minds of thoughtful proclivities, produced sentiments of mingled astoni shment and admiration. "History will necessarily in the future accord pages of highest praise to the Holy Father." said the speaker, turning to the policy of pacification during the Pope's pontificate. "Germany, Belgium, France and Spain were indebted to the policy of acts which have been of the greatest moment to those nations. Nor will America withhold its tribute of loyal and generous gateem, veneration and gratitude to him for those acts of his pondificate which have at various times been promulgated, and by which he has shown his confidence and hope in the grand future of this mighty nation. It is doubtful if the whole annais of ecclesiastical history can furnish an instance of a greater or more brilliant success than Leo has achieved. To a rare discernment of what the exigencies of the church and the age demanded, he has added a firmness which has enabled him to pursue the right course, in spite of all the obstacles which has enabled him to pursue the right course, in spite of all the obstacles which has enabled him to pursue the right course, in spite of all the obstacles which has enabled him to pursue the right course. manded, he has added a firmness which has enabled him to pursue the right course, in spite of all the obstacles which impeded his path, and a gentleness of disposition which impelled him to use mild means to accomplish his purposes, and which seldom falled to win him friends even among those who

Those who have carefully watched franchise developments during the last few months predict that another attempt will soon be made to have a Sixth-ward franchise advertised. In the discussion of the practicability of a street railway running through the Third-street tunnel, completing a belt line in the Second and Third Wards, the demand of residents of the Sixth Ward for a similar concession has dropped into the background.

But the residents of that bailiwick have not forgotten their desire for a competing railroad. The Los Angeles Railway Company has lines on Maple avenue, San Pedro street and Central avenue that pierce the ward and the company has a monopoly of the business.

When the franchise agitation was at white heat last January an imperative demand for the advertisement of another franchise to enter that territory was made upon the Council Delegations appeared before the Board of Public Works and tried to impress their grievances upon that body.

It was argued that only inferior services was given the residents of the section because of the lack of competition. The roadbed was said to be out of condition, and owing to the firm grasp on the nickels of the public no attempt was made to give quick and efficient service. Small cars incapable of accommodating the traffic were run over the road and in many ways the service was not up to the high standard demanded by the Sixth Warders. At that time a franchise application for a line to start at Third and Los Angeles streets and run to the city limits over Los Angeles, Washington street and Compion avenue, was under consideration. The Board of Public Works labored with the problem and eventually found no way to sell the franchise in accordance with the wishes of the people and the Traction company. Then the Broughton law was passed and a quietus put on the agitation.

But the Sixth Warders were only resting on their oars. That same application is still pending before the board. It was not granted nor denied, but simply nigeon-holed, awaiting the action of the

School trustees of Los Angeles county are being officially notified by County Superintendent Strine of the amount of the county school fund apportioned their several districts, as the third apportionment for the school year ending on June 30, 1901, being \$4.50 per capita on the daily average attendance of last year, and amounting to \$119.572.80. Last year the per capita for the corresponding apportionment was \$4.50.

Retrenchment is cutting a swath through the various civic departments and the park board was glad to escape with a reduction of only seven men during June. In order that the burden might not fall too heavily on the shoulders of a few men, it was decided to have the park superintendent lay off a man or two at a time for ten days, and so distribute the reduction over the whole force.

Mr. McGarry was first in favor of dropping out seven men altogether. He had heard that there are incompetent

men in the department, and by this method it would be easy to get rid of them. Dr. Dickson said that if there are any incompetent men and the Park Superintendent will name them, he will vote to have them permanently dismissed. will vote to have them permanently dismissed.

Superintendent Mendenhall, who is not desirous of drawing the Council ightning, discreetly held his peace. Finally, Dr. Dickson moved that the reduction be distributed as fairly as possible, the Superintendent to use his judgment, as to what men can be spared from the parks.

An anomalous situation developed with reference to a small park, 200x40 feet in size, situated at the eastern terminus of East Lake avenue. This park was offered to be dedicated as a park, and, in accordance with the provisions of an old ordinance dug from the moldy and musty archives, such a dedication imposes upon the city an obligation to accept the property. Sherman Page wants the park improved, but there are no funds with which to do the necessary work, and the proposition was tabled until such a time as the city's title is perfected by a deed.

WORK MOVING BRISKER.

Although few new wells are being drilled in the northwest arm, there is considerably more activity in the field than there has been in some time. The owners of producing wells are confining their attention to the pumping fack, with very creditable results.

One of the newest of the successful oil producers is the Hub Oil Company, which recently purchased the property of the Cahuenga company near the corner of Western avenue and Temple street. There are now six wells producing on the property, all of which have been drilled by the Adams Bros. Contract Company.

The Baldwin-Phillips-Keeley well No. 2 was put on the pump for the first time this week, and has since kept up a good ten-barrel-production.

The Loma Vista and B. B. companies are pumping, but have shut down all development work.

ducers' Association will be held in the office of the corporation in the Tajo building; this evening, and it is announced that local producers are invited to attend.

It is also announced that no attempt will be made to perfect the organization, but it is expected that another step will be taken in the interest of the combine. The principal matters for consideration are the appointment of two committees; one to work up the membership of the association among the oil producers that have not already entered the fold, and the other to consider ways and means for the handling of the product. When the latter committee is ready to report another meetmittee is ready to report another meeting will be held, and at that time a new board of directors will be elected, and permanent officers selected.

At present Edward Quinian, caller of the Los Angeles Stock Exchange, is reting secretary, and it is anticipated that has appointment will be made permanent.

An eastern syndicate is now considering the purchase of a large tract of the Superior Oil Company's holdings in section 2, 11, 24, the consideration being close to \$200,000. On the property are two completed wells, and a third one in oil sand. The company has given an option which will expire before the end of the present month.

Out in Piacerita Cañon the showing made by the principal operators as the result of their last month's efforts is decidedly disappointing.

The New Century Oil Company has lost much time in getting well No. 3 started, but at last it is under way and the operators hope for a clean passage of the drill. The last report from the plant gives the depth reached as 85 feet.

There is trouble on hand for the Freeman & Nelson, operating south of the New Century. In their second well a string of tools has been lost, and, although every effort has been made, so far they have resulted in failure.

S. P. IS NOT IDLE. S. P. IS NOT IDLE.

The Southern Pacific Railway Company seems to have started in for a record in the hauling of Kern oil. During the first twenty-one days of this month the company has hauled 1100 carloads, or nearly 171,000 barrels of oil from the Kern River field. A large number of the company's new cars are now in commission.

The Barrett drilling outfit sent out from San Diego is being installed on the desert not far from Palm Springs. Desert filings continue to keep the Recorder of San Diego busy. A total of \$730 acres have been taken up.

The Devil's Den Company is down \$00 feet, and it is reported the drill has passed through a sand holding oil too thick for pumping.

Another question to taxpayers is that of mortgage tax, for which we in California are indebted to that great statesman, Dennis Kearney. It is a well-known fact that—as might have been expected by any intelligent person—the result of this tax was to increase the burden placed upon borrowers, rather than to decrease it. A correspondent of Bradstreet's recently wrote to that paper from San Francisco as follows:

"I have read with interest your comments on the proposed taxing of mortgages in New York State.

"Having been a borrower here, I can assure you that, from a poor man's standpoint, the proposed measure is against his (the poor man's) interest. All mortgages are of necessity recorded here to secure the lender, all pay taxes regularly, and it is always added to the price at which one can borrow money. For instance, 'gilt-edge' San Francisco loans on real estate bring 6 to 5½ per cent., while you could borrow the same money at 4 to 5 per cent. on equally good security of another kind. It is even worse than that on suburban people, where taxes are, say, 2½ per cent. If the lender wants 6 per cent. net he will charge 9 per cent. to keep safe; hence the small borrowers on homes are the greatest sufferers."

men" and the minority "broad churchmen" and one irrepressible delegate of the latter element gave voice to his conviction of the existence of a "slate." Dr. George Thomas Dowling, the popular rector of Christ Church, this city, supported by his delegation, Judge Stephens, Judge Anderson and George W. Parsons, were the leaders of the "broad churchmen," together with Rev. William MacCormack of Pasadena. Dr. Dowling personally took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and Rev. William MacCormack seemingly took very little part in the debate, and the clergy, in the language of a delegate. "brought their ritualistic ideas with them from England." and were relentless. The feeling was heightened by the fact that, by a peculiar combination of unfortunate incidents, the church of Dr. Dowling was severlooked in the distribution of blank reports, and also in the assignment of delegates. His delegates were inclined to resent this, but explanations followed, showing that it was accidental, but, if it wasn't, the diplomatic rector heaped coals of fire on the heads of his enemies, when he jumped to his feat and said, in a forcerful way:

"I am extremely sorry that this matter should have been brought up in this convention. Everybody who knows Mr. Robinson, secretary of the rectors' meeting, knows that nothing was done intentionally; that it was all the result of accident, and I trust this matter will be dropped right here, and that we may hear no more of it."

The manner, as well as the language of Dr. Dowling cause

ing from the button-holing tactics in the parish-house yard, it was perhaps a providential occurrence that gave the floor at the very first, after the falling of the bishop's gavel, to Rev. Dr. Brown to present the claims of the Jacksonville sufferers. He spoke but a few minutes, and said:

"I come to say not for continue."

CLEARING THE DECKS.

"I want you to understand that it is a rule of this house," said Bishop Johnson, as he arose to clear the decks for the coming election storm. "that ne person shall speak moye than twice upon any subject, and it will be strictly enforced. So, when your heart fills up with emotion, and your head with argument, just hold yourself in control until your time comes," [Laughter and applause.]

He then began to clear the table, and a number of routine committee reports were brushed off.

The report of the Education Committee was adopted, recommending careful consideration of the proposed diocesan school, between now and the meeting of the next convention, in the hope that definite action might be taken at that time.

THE BISHOP'S MODESTY.

Dr. Dowling read the report of the Good Samaritan Hospital, showing that did patients had been treated during the year, that the earnings had been \$12,883, and that there was a cash balance of \$515 in the treasury. Dr. Dowling also announced that a new site had been secured, and that Bishop Johnson had already received three subscriptions of \$5000 each toward the erection of a more commodious hospital. [Applause.]

"Tou have every reason to be proud of the one charity belonging to the diocese," said the bishop, "and I do not say this because I happen to be its president. [Laughter.] Each month we have been able to do from \$150 to \$250 worth of free work, [Applause.] It is something to be proud of. A lady recently said to me: Bishop, you are extremely modest in your demands for money. I started out to raise \$25,000 and somebody said it ought to be \$50.000, and a gentleman from the East said. It ought to be \$100,000. I see up at Portland they are putting \$250,000 in just such an enterprise, so I feel sure you will recognize my extreme modesty when I ask for \$50,000 for this purpose."

OTHER OFFICES FILLED.

The following alternate clerical delegates were elected: W. H. Wotton, William MacCormack, F. S. Johnson and Alfred Fletcher.

The election for lay delegates resulted as follows: D. Cleveland of San Diego, Henry T. Lee and T. L. Winder of Los Angeles; J. Bakewell Phillips of Pasadena. Alternates: James F. Towell, Dr. Cowles, C. E. Adams, Dr. Balrd.

Standing Committee—Rev. B. W. R. Tayler, Archdeacon Trew, Rev. H. B. Restarick, Rev. W. H. Dotten, T. L. Winder, J. B. Phillips, J. A. Anderson, D. Cleveland.

In selecting the clerical part of this committee the contest was between MacCormack and Dotten, the laymen voting in favor of the latter, which was another test of the "high" and "broad" forces. On the second ballot Mr. MacCormack got the marble hand. For the lay portion of the committee there were but four nominees, all four to be elected, one of them being Judge Anderson of Dr. Dowling's church. A motion that the secretary cast the ballot for the four was objected to by Restarick of San Diego, and on a ballot being taken Judge Anderson fell three votes under the "high" portion of the ticket, but of course was elected to the committee.

Board of Missions—This committee was all reflected as follows: Rev. William MacCormack, Rev. Charles E. Spalding, Rev. Henderson Judd, Rev. William H. Wotton, J. E. Cowles, J. Bakewell Phillips, Charles T. Hinde, W. Crezswell Mushet.

THE EVENT OF THE DAY.

Everything was now ready for the election, and, with characteristic promptness and no waste of words, the bishop announced that nominations would be received for the election of four clerical and four lay delegates to the general convention. The following clergymen were quickly named, without any set speeches being made: Rev. M. R. Tayler of Los Angeles.

Mrs. De Camp and Mrs. Dic THE ELECTRIC GAMBLE.

Ingenious Device of Local Bartender for Evading the Law.

Dice shaking over bars and

cigar counters in Los Angeles has been tabooed by Chief Elton and his cohorts, to the dismay of those interested in the plunging incidental to paying double for nicotine. It has been argued that the new anti-gambling ordinance does not prohibit dice shaking, but at the same time no one has cared to take a chance since the edict of the chief went forth. However, there are numerous followers of the cocktail route in Los Angeles, and in wooing the gentle bird they love to dally the while with the cheap, if fickle, chance that shows its many faces on the "bones." For a time it seemed there was no balm in Gilead for the disappointed ticklers of fortune, but yesterday an ingenious bartender evolved a great idea, and the fame of him and his new game galloped all over town before night. In brief the scheme is this:

an electric fan is placed at the end of the bar and each of its blades are numbered. but that is merely incidental for, of course, the fan is there merely to keep things moving-and if it moves small change and other things besides the air, nobody can be blamed for that. Around the support at the top of the fan a piece of colored yarn is tied and the blade that stops closest to that yarn after the "juice" has been turned off is the winner. The bartender avers a faith in either the odd or the even numbers, the outsider nails his hopes to the other; somebody remarks that the room is close, and the dance is on. The mixologist -merely to avert a stroke of apoplexy in his customerturns the button; the air is started; the customer is relieved. Perfectly beautiful! Then to save expense to the house the customer requests that the fan be stopped (since it is no longer needed) and then everybody peers at the blades to better understand

the workings of Mr. Edison's atly-celebrated invention Their curiosity satisfied-after the fan stops-some one casually observes that some one else has been casually stuck, and either the house or the customer accepts the ukase of

MANY "BENEFIT" VICTIMS.

Mrs. A. E. Dodson, president of the Helping Hand Home, has invited all those who contributed money for the Home at the solicitation of Miss Barnes, to forward their names to her. Many people are responding. The total turned over to Mrs. Dodson in the several calls of the five-days' canvass was \$132. It is believed, however, that this is a small portion of the amount collected, and on which Miss Barnes pockets a commission of 100 per cent. The idea of sending out a stranger to collect for the Home on the commission plan is condemned, even by friends of the institution. Mrs. Dodson has published notices in the local papers stating that further collections are unauthorized for the present. Miss Barnes made several \$25 scoops in her rounds. MANY "BENEFIT" VICTIMS.

JACK JEFFRIES TALKS.
CHAMPION IN FINE SHAPE.
Jack Jeffries, brother of the heavyweight champion, and something of a scrapper himself, said yesterday that Jim would be in this city some time next week.

"He is in better condition than I have ever seen him," said Jack when talking of his brother, "and all this talk about his arm is wrong. When Jim gets into the ring again he will selence all of them. He is anxious to night, and his go with Ruhlin will be pulled off some time in July. Jim has made a lot of money on the road, and has proved a big drawing card wherever ever he has appeared."

Jack Jeffries has a bad leg, which was abraised in a training bout with Jim, and blood poisoning set in when the raw surface was exposed to the color of his tights. He is fast recovering, however, and will soon be in chape to go into the ring. It was thought that Griffin and Jack would make a fast go, but Jack draws the color line, and this is off. It is probable that he will be matched with Ben Tremble. They ought to make a good fight, as there is little difference in their weights, and they are both able that he will be matched with Ben Tremble. They ought to make a good fight, as there is little difference in their weights, and they are both able that he will be matched with Ben Tremble. Abductor Alleged to Have Been the Son of Gov. Sanguines - Senorita Later Turns Up near Tia Juana and Is Re-

SAN DIEGO, May B.—[From The Times' Resident Correspondent.] An outline of an interesting story of the alleged abduction of Luciana Gonzales, a pretty Mexican girl at Ensenads, has reached here. The girl was employed at the store of Fred Goldbaum, where a young man, said to be the son of Gov. Sanguinez, arrived in the evening after she had retired. He demanded of Mrs. Goldbaum, who was alone in the store, that the girl be allowed to dress and accompany him. Mrs. Goldbaum protested, and the fellow made a rush for the upper chamber. He was met by Goldbaum, and a fight ensued on the stairs.

the girl had fied.
Goldbaum is said to have sworn out a complaint the following day, but so arrest was made.
Four days later a soldier demanded of Goldbaum the delivery of the girl's trunk. Later the girl was found and turned over to the wife of a rurale, near Tia Juans, who delivered her to Griggs Ascarte, by whom she was assisted into American territory. In response to a telegram she has since returned to Ensenada. urned to Ensenada.

into the can ask are transferred to a basket or bag. The gatherers in winter will travel in snowshoes ten or fifteen miles through the forest, sleeping at night in some old hunter's deserted shack. There are three kinds of spruce in the Adirondacks—red, black and white. The best yum is gathered from the sapwood of the white spruce. The rarest of the yum is the "blister," which is translucent, and turns blue after being chewed. After being scraped, washed and brightened it sells for \$1.50 a pound. There is a coarser grade, composed of blister scrapings, mixed with particles of bark. Placed on trays of cotton cloth in a steam tank, the gum is drawn out and yields the producer 50 cents a pound, forming the ordinary chewing gum of commerce. Some manufacturers adulterate the gum with paramin, rosin and chicle.

ALTERED CHECKS. The following decision upholding the responsibility of a bank for payment on altered checks, even if the alterations were made by an employé of the party issuing the checks, says the Grocers' Advocate, is of much interest, and it confirmed by the Court of Appeals will cause some radical alterations in the working rules of banks.

An abbreviated form of the decision is as follows:

box, of course, as they are not packed for shipping. There are not over fifty pounds to the box. They come in here in small lots, six to ten boxes, and are not if much demand, as merchants are not if much demand, as merchants are not prepared to handle them. They are usually of poor quality and sell slowly at these prices. Few grocers, probably sell uncured lemons, and few shippers want them.

Cherries sold at 75 cents for black and 75 to 85 for Royal Anns.

Raspberries brought \$1.50 per crate. Strawberries are firm.

Oranges are moving very actively for this season of the year. Navels begin to get scarce, particularly for favorite sizes of good quality. There are 2000 to 3000 carloads of all kinds of oranges left in the section according to the best guessers.

Great severity of discipline still existed; pupils were flogged unmercifully. Teachers seemed to have a perfect passion for punishment. I read recently some pages of the diary of a very genial gentleman, a librarian of the American Antiquarian Society, who had been a school master in his youth, and who died in 1840. One entry told of a ride in a stage coach with a mother and young child who cried. He said; "Such is my temper of mind toward every child I see since I kept school that I could scaree keep from thrashing him. I long to beat every child I neet." FIT" WORKERS' Home veteran who committed suicide yesterday in the Arroyo, rendered a verdict in accordance with the testimony of his comrade, Robert A. Douglass, which was little different from the report published in this morning's Times. Douglass said Hutchinson had abstained from the use of liquor for some time, but began drinking again Tuesday, and the alcohol, combined with a chronic affection of the stomach, caused him much pain, probably leading to the suicide. Hutchinson and Douglass were comrades for more than two years in Co. H of the Sixth California Regiment, and Hutchinson at one time was a member of the police force at the Soldiers' Home. The remains will be taken to the home for interment.

NEW PACKING-HOUSE.

The Duarte-Monrovia Fruit Exchange decided at its last meeting to build a new packing-house in Monrovia, and has appointed a committee, consisting of A. H. Johnson, G. A. Lawrence and M. H. Holmen; to make the necessary arrangements. Heretofore all the packing has been done at the Duarte packing-house, but the output is increasing to such an extent that the one house cannot handle all the business. The new packing-house here will greatly facilitate the shipping of oranges and lemons by extent for his granddaughter, Miss change members. An option has al-ready been secured on the Southern Pacific Railway.

There is a good demand here for fur-nished houses, and unfortunately the demand cannot be supplied.

Karl Stromee has returned to his home in Los Angeles, after nearly nine months spent in San Francisco. During his absence he underwent an exciting experience. He left Los Angeles last September to enlist as an apprentice in the United States navy. While detailed on the ship Edward Sewell hell from the topgallantsail, a distance of ninety feet, and sustained injuries which kept him in a San Francisco hospital for several months. He arrived home yesterday, fully recovered and is now with his parents, Mr. and Mrs. G. Stromee, at No. 1547 Council street.

Bad Man Locked Up.

Bad Man Locked Up.

Robert Lee Dinwiddee of Los Nictos was locked up at the City Jall last night for medical treatment. He knocked two men down at Fifth and Main streets, and when the victims howled for the police, Dinwiddee jerked a gun from his pocket. Officer Matuskiewicz pursued the fellow a block and finally caught him, but later had to knock him down and handcuff him. When searched at the station the prisoner had a pistol and a dirk in his pockets, and retused to give his name. He declared some man had shot at him twice and he pulled his pistol to defend himself. He was finally put into a strait-jacket and strapped to a cot if the Receiving Hospital, where he hewled and sang until long after midnight.

Miner Accidents.

Riner Accidents.

C. V. Whittaker, a carpenter living at No. 1817 West Thirty-seventh street, fell ten feet from a scaffolding yesterday on a house being erected at No. 123 Linwood street, receiving several had bruises in his back. Charles Bleck, residing at No. 1120 East Washington street, fell from a back porch at No. 258 South Main street yesterday evening and dislocated his right elbow. V. Burk, a colored man of No. 724 Mateo street, was thrown out of a buggy yesterday afternoon and cut on the left ear. All of these accidents were treated at the Receiving Hospital. T. C. Greenbaum was also treated for a "black eye" resulting from a fight, and James Chapman of Bakersfield had a "foxtail" pulled from his left ear.

Prisce Not in It.

City Treasurer W. H. Workman is back from a trip to San Francisco, where he attended the celebration in honor of the President. The City Treasurer has a reputation for truth and veracity that is without a biemish, and when he says that the reception to the Presidential party here was way ahead of that in San Francisco, everybody in town will believe him. In street decorations by day and night and in many ways Los Angeles was in the lead, he says. San Francisco surpassed with the water display, but that was the only superior feature. Members of the Cabinet, he says, are still talking about the Los Angeles reception, and from what he heard the City Treasurer believes that this city made a better and more lasting impression than any visited during the tour.

Chinese Labor Scare.

There is a labor famine in Chinatewn. The vegetable farmers are unable to get men enough to work their ranches. Many of them are running short-handed and much work that would otherwise be undertaken has had to be postponed or abandoned because of the scarcity of help. The result is that the prices have risen. Ordinarily the Chinese price for unskilled abor is from \$1 to \$1.25. You don't get a Chinaman to work on the vegetable farms for less than \$1.75 now. 'Just at present there are many acres of land being broken by the Chinese for gardens. New lands out on the foothill by Whittier, never before so used, are being rapidly opened up. The vegetable men say the new foothill farms comprise the best land for vegetables in the world.

That was the absurd situation of a gang of clubroom men on South Main street yesterday afternoon. They wanted to test the new poolroom and gambling ordinance. They wanted to be arrested.

They sent word to the Chief of Police that they would be at home and in running operation at 3:30 p.m.

They made elaborate preparations for the event. They had the room all cleared out, except for a table and a few chairs. Each man had his bail money in his pocket and when the fatal hour came around they were playing a faked-up game of poker to beat the band.

But the police unkindly failed to take any notice of it. They were not going up against a "spiked game" and they let the card playing go on serenely. The sports played for a long time, waiting for the police to do something to them, but at last gave it up in huge disgust.
